

Bradenton/Palmetto Downtown Mobility Study

Final Community Workshop

Please take this opportunity to comment on the draft Multimodal Connectivity Plan for the Bradenton/Palmetto Downtown Mobility Study.

You are invited to participate in the final community workshop for the Bradenton/Palmetto Downtown Mobility Study. The objective of this workshop is to get your feedback on the draft recommended plan, including both short-term and long-term strategies.

The study materials can be reviewed at www.downtownmobility.com (refer to the *Products and Maps* page). This workshop will focus on presenting recommendations for roadway, bicycle/pedestrian and transit system improvements, project costs, priorities and an action plan. You will be able to review and comment on specific design proposals for a new downtown transit center, modifications to the Green Bridge to encourage bicycling and walking, traffic calming features such as roundabouts, and ways to make Manatee Avenue, 14th Street and 8th Avenue in Palmetto more pedestrian-friendly while maintaining traffic flow. The workshop starts at 5:30 pm, with a brief presentation at 6:00 pm and group discussion to follow.

Please join us as we finalize the Multimodal Connectivity Plan for downtown Bradenton and Palmetto. Refreshments will be provided.

February 18, 2009

5:30pm to 7:30pm

**Presentation at 6:00pm*

Bradenton Municipal Auditorium • 1005 Barcarrota Boulevard
